## Knights of Pythias Elect Officers for 1927

A Short Synopsis of What The Order is Doing

The international extension program announced recently by officers of the Supreme Lodge, Knights of Pythias, will, in a large measure, direct the activities of Sentinel Lodge, No. 25, of Coleman, according to Chancellor Commander H. Snowdon, who was recently installed with eight other officers of the lodge to direct the work of the Pythian fraternity in Coleman during the year. The program, includes among other activities a definite plan to increase the social features, quicken interest in community service and to make a stronger appeal to worthy citizens to become members of the Order. The lodge has set as a mark in the increase of its membership under the general plan announced by the Supreme Lodge to secure a twenty per cent net gain during the year.

Commenting on the outline for the new year, Chancellor Commander H. Snowdon, said: "The program is intended to make the lodge a real factor in the life of the community and to aid in the extension of the benefits of fraternal membership by performing its share in the great national movement. The movement is supported by nearly one million members in the United States and Canada. We have over 6,400 lodges and it is the purpose of the program of activity to make every one of these lodges the center of fraternal accomplishment in performing the service for which the fraternity was founded—to make better homes and better communities in which to live."

"The Pythian Order now operates eighteen homes for aged members, their widows and orphans. Five other states are building homes. Investment in this phase of Pythian endeavor amounts to more than \$4,000,000 and over 2,000 men, women and children are provided with home comforts. Five grand domains have established educational trust funds by which worthy young men and women are given opportunity for advanced college training. Nearly two hundred are now being kept in colleges through loans from these funds."

"The Pythian Sisters, the women's auxiliary of the Order, has a membership of nearly a half million and distributes annually more than \$250,000 for the care of orphaned children and for the comforts of the aged and poverty stricken."

"In every respect the financial condition of the Order is gratifying. The Subordinate Lodges distributed last year \$1,709,000 for relief. The assets of Grand and Subordinate lodges are over \$80,000,000, a gain of over \$1,015,000 for the year, and in 1926 sixty-six lodges built their own homes costing more than \$8,000,000. Our lodge in adopting this program will take definite steps to carry out the objectives of other lodges over the Supreme Domain."

The following officers were installed:

- C. C.—H. Snowdon.
- V. C.—J. E. Low.
- M. of F.—J. McCulloch.
- M. at A.—J. E. Phillips.
- K. R. & S.—P. Locke.
- M. of E.—H. Dunlop.
- M. of W.—J. Denholm.
- Prelate—W. Wilson.
- O. G.—R. Jones.
- I. G.—W. Jones.

## An Appeal for Relief From Makinson, B.C.

Mr. J. S. Rogers, of Coleman, has recently received a communication from Mr. Walter Williams, of Makinson Landing, Arrow Lakes, B.C., asking him to do what he can towards soliciting funds in this locality for those families that were bereaved by the sad drowning fatality which occurred on the Arrow Lakes early on the morning of January 1st. In this connection Mr. Rogers has asked The Journal to give this appeal publicity through our columns, and we are taking the first opportunity to do this, as the cause is indeed a worthy one and four of the five who met such a tragic end, were old-time residents of Coleman and have many old friends in our town and district. As we, in Coleman, have but recently had a similar sad experience, it is hardly necessary to deal at length with a matter of this nature, other than to say that Makinson is just a small settlement on the shores of the Arrow Lakes, and it is not at all likely that very much money can be collected from the few settlers in that vicinity, so if these people are to receive any help, the greater part of the money must necessarily come from outside sources. Those in Coleman and district who desire to make contributions to this fund may do so by sending same to The Journal or direct to Mr. Walter Williams, Secretary of the relief fund at Makinson Landing, B.C.

Below will be found Mr. Williams letter to Mr. Rogers:

Makinson Landing, B.C.  
Jan. 10th, 1927.

Mr. J. S. Rogers,  
Box 190, Coleman, Alta.  
Dear Mr. Rogers:

I am writing you on behalf of a committee formed to organize a Relief Fund in aid of the families that received such a terrible blow on New Year's Day at Makinson Landing, Arrow Lakes.

Doubtless you have heard of the sad calamity and I assure you that the cause is deserving.

One family of three, while the father was away on the prairie, were all lost and on his arrival here, his home had been turned into a mortuary.

Another case, a widowed mother is left behind having lost her son, her only support and through this calamity the home will be deserted.

Another, a widower having lost his daughter, the only one at home, has lost the only comfort he had.

We feel that their loss is our loss, being that our community is so sparsely populated and we are endeavouring to help them in a material way to tide them over the effects of this hard blow.

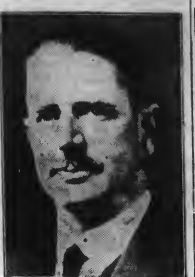

Will you lend us your aid in this connection by soliciting your friends for any donation, large or small, that they feel inclined to contribute towards helping us to attain our object.

Yours truly,  
Walter Williams,  
Sec.-Treas. of the Relief Fund.

Exhibits for Poultry Congress

Attention of poultry breeders is called to the fact that in preparing for exhibits at the world's poultry congress in Ottawa next July, heavy weight breeds should be hatched in January, and light weight breeds in February to be ready for the congress. Many Alberta breeders are planning to exhibit.

First Municipal Airplane

NEW ZEALAND PREMIER VISITS CANADA  
Hon. J. G. Coates, Prime Minister of New Zealand, is the second Dominion Premier to visit Canada on his way home. He is scheduled to arrive in Montreal this week.

## Magic, Vaudeville and Pictures at The Grand

Bert Johnston's magic and fun show, under the management of Joe Marks, one of the famous Marks Bros. who have toured Canada and the United States for years, will fill three nights engagement at the Grand Theatre, Coleman, on Monday, Tuesday and Wednesday, January 24, 25 and 26.

This company played eight consecutive weeks in Winnipeg, two in Regina and nine days in Calgary, playing all the important towns between Toronto and Calgary. Arrangements have been made with the management of the Grand Theatre to show a feature picture with each performance during the engagement.

Mr. Johnston's part of the program consists of magic, music, mirth, mystery and art. The company number six people and magic and vaudeville is put on nightly.

As a magician, Bert Johnston stands in a class by himself and is the most entertaining of modern magicians. The illusions, etc., by the company, together with the big feature picture, will send you home wondering how it can be done for such a cheap price. But the way it can be done is by packing the show house to the doors each night, and that is just what we expect you to do during our engagement.

Other noted members of the company are: Al. J. Smith, master of the violin; Salvali, the wizard of the violin; Madame Muriel, a card king; and Madame Muriel, the most amazing actor ever presented.

Madame Muriel is the possessor of one of the rarest gifts known to humanity, that of being able to know, forecast and solve mysteries, and in other ways go beyond the limit of the human brain. Her act is not mind reading or similar to any of the many (fake) acts so often run on the stage. She does not know herself. She has been under investigation by famous scientists who proclaim her as genuine, and her answers are 95 per cent correct.

## Pythian Sisters Hold Installation of Officers

Progressive Temple No. 3, Pythian Sisters, held their joint installation with Sentinel Lodge No. 25, Knights of Pythias, on Monday, Jan. 10th. The officers of Progressive Temple No. 3, are as follows: P. C., Sister E. Hughes; M. E. C., Sister A. Cousin; E. S., Sister A. Phillips; E. J. Sister M. Reid; Manager, Sister E. Muir; M. of R. C., Sister E. Jones; M. of F., Sister B. Ford; Protector, Sister M. Chabmes; Guard, Sister C. Pearson; Pianist, Sister E. Hopkins; Treasurer, Sister L. M. Nelson; Trustees, Sisters E. Richards, Escoff and Gillespie.

## THE MAIL BAG

January 17th, 1927  
The Editor Coleman Journal,

Dear Sir:—  
In reply to the letter in your paper, Re War Memorial, this matter has been taken up with the Council with the result that plans already have been made, these will be put before the Council at our next meeting. We would suggest that the War Veterans send representatives to this meeting, as any assistance they could give would be appreciated.

Yours very truly,  
Works and Property Committee,  
James Moore,  
George Pattinson,  
John M. Raabson.

## Coleman Rebekahs Install New Officers

Installation of officers took place at a special meeting of the Victoria Rebekah Lodge, No. 7, on Tuesday evening, in the I.O.O.F. hall, S.I.M. Burns D.D.P., assisted by Sister S. Borrows P.N.G., installed the following officers:—

J.P.N.G. Sister M. Pattinson; N.G. Sister G. Nielson; V.G. Sister M. Yates; Recording Secretary Sister E. Lonsbury; Financial Secretary Sister M. Antel; Treasurer Sister M. Dunlop; Chaplain Sister B. Bowen; Warden, Sister F. Beart; Conductor, Sister M. Olson; O.G., Sister M. Van Marion; I.G., Sister Miller; R.S.N.G., Sister R. Dunlop; P.N.G.; L.S.N.G., Sister L. Boulton; P.N.G.; R.S.V.G., Sister S. Campbell, P.N.G.; L.S.V.G., Sister A. Ash; Pianist, Sister L. Borrows.

Sister I. M. Burns in a few well chosen words presented Sister M. Pattinson with a P.N.G. jewel. S.I.M. Pattinson responded, thanking the officers and members for their co-operation during the past term. Sister I. M. Burns, P.N.G., was recommended as the D.D.P. for the ensuing year.

## Variety Concert Postponed

Mr. William J. Harris regrets to announce that the concert due to take place at the Grand theatre on Jan. 24th, will be further postponed until Feb. 7th.

Everything is under way for this concert, and although the postponement will disappoint many, it proves the only course to take under the circumstances, and music of a higher standard can be looked forward to. It is advisable for all those anticipating attending this concert, that they purchase their tickets now to ensure a seat.

Tickets can be bought from any of Mr. Harris's pupils in Coleman. Now, Coleman, this is the time to support your local talent, and encourage the young musicians of your town.

## Progressive in Health Matters

An outstanding example of the manner in which Alberta has kept in the forefront in the progressive public health legislation comes as a result of a request from the Canadian Medical Association to the Alberta Government to establish institutions for the care of drug addicts. Alberta's Minister of Health has pointed out that two years ago the Alberta Government passed the necessary amendments to the Mental Diseases Act to make provisions for the care of drug addicts at our mental institutions. A number of these addicts are now being cared for at these institutions. The Canadian Medical Association has congratulated Alberta on her progress in this matter.

## United Church Notes

The very severe weather interfered with the attendance on Sunday. This was unfortunate from the standpoint of The Woods Children's Homes. However the church was half filled at night and the special offering amounted to fifty dollars and several promises. Anyone wishing to help may do so even now. A service of the town is being arranged by the L.O.B.A., and any amounts given to the church will be sent on.

## Annual Meeting

There was not a large attendance at this meeting, perhaps on account of the storm. The reports read were all very encouraging and hopeful for the future. The various boards and committees remain as before with the addition of Messrs. Hayson and Alex. MacKinnon to the managing board. The Ladies Aid served refreshments at the close in their usual generous style.

## The Religion and Poetry of Robt. Burns.

The subject for discussion at the evening service next Sunday at St. Paul's will be "The Religion and Poetry of Robt. Burns." This should be of general interest as Burns Night is now observed in most places. This is not a lecture on Burns, but an effort to discover the religious element in his poems. A general invitation is extended to all.

## Boys Hockey League

The Coleman rink was a carnival of fun on Saturday morning, when the Senior and Junior boys opened their hockey schedules.

The Scouts, in a Junior fixture, took the first game from the Trail Ranger second team quite handily, 5-0. In the first Senior game the Tuxis A team nosed out the Outlaws, 3-2. Emmerson played a pretty game in goal for the winners, while Morris was probably the pick for the losers. The Outlaws lacked in team play, but otherwise they looked good and will give a good account of themselves before the schedule progresses very far. The Tuxis B team took the final encounter of the morning from the Tuxis A boys, 3-0. The winners played nice combination on the forward line and earned their victory.

In the Trail Ranger league the Coleman camp took the long end of a 4-3 score. It was a very evenly contested game, with the local lads showing a little more finish in team play. Fraser, Pattinson and Clarke worked well for Coleman, while the Hillcrest goalie made numerous saves of shots that were tickled for counters.

The games for Saturday January 22nd are:

Juniors  
W. Coleman vs. Trail Rangers  
Trail Rangers vs. Scouts  
Seniors  
Tuxis A vs. Tuxis B

## Alberta's Oil Production

Alberta's petroleum production will exceed 200,000 barrels for 1926, when all returns are in, compared with 188,000 barrels in 1925. The production of Royalite No. 4 well, in Turner Valley, exceeded 190,000 barrels for the year up to November 20, the average production being 528 barrels of naptha per day.

## Alberta's Coal Production

Preliminary figures on Alberta's coal production for the past year show the total to be 6,117,000 tons, which is an increase over the previous year.

LEGACY FOR WINNIPEG

This old waiter, Frank Elson by name, has left his much-prized old china collection to Winnipeg. Born in 1846, he had served at Simpson's Restaurant in London, England, for over 35 years. He had no relatives, did not smoke or drink, and was a very conscientious old man. His home was a little room near Westminster Abbey, and his ambition was to be a great collector of china.

## St. John Ambulance Commence Classes

The St. John Ambulance Association commenced their classes on Sunday, Jan. 16th. Dr. Borden gave his first lecture on St. John Book which proved very interesting to a class of 34 pupils who have been enrolled. Anyone wishing to take in these classes should attend next Sunday as they require five lectures before being able to take in the examinations.

## Alberta Legislature

The first session of the Alberta Legislature newly elected last June, will open on February 10th, it is officially announced by the government.

## Here and There

Philadelphia—The silver cup for the best display of poultry at the Sequenential Poultry Show was won by the Hon. John S. Martin, Ontario Minister of Agriculture.

A newly constructed line of the Canadian Pacific Railway between Unwin and Lloydminster in the Province of Saskatchewan is now in operation. This line 20.6 miles in length will greatly assist the farmers of the district in marketing their grain.

Lord Clarendon, Under-Secretary of State for Dominion Affairs in the British Government, sailed for England from Quebec on the Canadian Pacific liner "Empress of France," September 29th, bringing to a close an extended tour of the Dominion investigating the conditions under which the 3,000-family immigrant scheme is being carried out in Canada. His Lordship, who is chairman of the Overseas Settlement Board under whose auspices this scheme is being conducted, made the statement before his departure that he was greatly satisfied with the conditions among Britishers who have settled in Canada under this scheme. He personally visited over 100 families.

## St. Paul's United Church of Canada

Sunday, Jan. 22nd  
2.30 p.m. Sunday School.  
11 a.m. Morning Worship.  
7 p.m. Evening Service.  
You will enjoy the congregational singing.  
Strangers and visitors cordially invited to the services.  
H. J. Bavan, Minister.

## MANITOBA MAY HAVE VOTE TAKEN ON NEW BEER BILL

Portage la Prairie, Man.—It may be that new legislation suggested from divers quarters materially changing the principles of the present liquor law may be found necessary, but the people having decided on the present law, my personal view is that they should be given an opportunity to express an opinion about any proposed new law of this nature.

A statement to this effect, made by Hon. R. W. Craig, attorney-general, in concluding an address on the "liquor situation in Manitoba" before the U.E.A. convention here, and interpreted as foreboding a referendum on the proposed "beer bill," a petition for which is being circulated throughout the province. A further exhortation to "keep the liquor question out of the sphere of political influence" was construed as indicative of the provincial government's intention to forestall possible action by any other political party to adopt a liquor plank in their election platforms, by definitely committing itself to a pledge that the people should decide.

Mr. Craig also intimated that certain preliminary questions were to be submitted by Manitoba to the customs commission when it sits in Winnipeg.

He indicated that when the customs commission met in Winnipeg, the province would make a submission urging reductions in the customs and excise duties and taxes to enable government agencies to compete successfully with the bootlegger.

Consolidation of powers. Previous on a third address, a matter which he stated was within the powers of the federal authorities, also would be suggested to the commission. In the latter case, joint federal and provincial action was necessary to meet the situation.

Commenting on criticisms of the provincial government's handling of the liquor situation, Mr. Craig stated that "at no time in the history of Manitoba has as much money been spent, as many men employed, and as great effort exerted in the administration and enforcement of the liquor laws of this province as during the past year."

Referring to the beer situation, the attorney-general said that "seventy-five per cent of the beer consumed in this province is now due to the illicit sale of beer, and the most of that is due to the brewers who furnish the supplies and abuse the privilege granted to them under the government liquor control act."

## Urge Expulsion of Chinese

Suggested as Counter Measure by Service League at Victoria.

Victoria, B.C.—Confiscation of property owned by Chinese in Canada and expulsion of all Chinese from the country is advocated in a resolution that the Britannia post of the Canadian League of the British Empire Service League passed and will submit to the Dominion convention at Winnipeg this month, with the request that such recommendations be made to the federal government. This was suggested as a counter measure to the driving of British subjects out of Hankow and other Chinese cities.

**Set Record for Canada**  
Midland, Ont.—With the launching of two steel hulls for the Canada Steamships lines from the yards of the Midland Shipbuilding Company here, a record was established in the annals of shipbuilding in Canada, for it is the first time that two vessels have been launched from the same yard in one day. They are 238 feet over all, 28 feet beam and 22 feet deep and will have a speed of 12 miles per hour.

**Increase in Savings Deposits**  
Ottawa.—An increase of nearly 20 millions during the month of November, 1926, in the total of savings bank deposits held by Canadian banks is shown in the bank statement issued by the department of finance. The statement shows that savings deposits held on November 30 last amounted to \$1,567,295,012. At the end of the previous month they stood at \$1,547,561,144.

**Soviets Assist British Miners**  
Moscow.—In response to a telegram from Herbert Smith and A. J. Cook, president and secretary, respectively, of the Miners' Federation of Great Britain, asking help for British miners suffering as a result of the coal stoppage, the general council of Soviet Labor unions has transmitted \$10,000 to the Federation.

W. N. U.

## May Discuss Coal Question

Parliament Likely to Give the Matter Attention This Year

Ottawa, Ont.—The coal problem has always been a more or less pressing one in Canada, but the indications are that it will take a more prominent place in the discussion of the coal question both inside and outside of the Dominion Parliament. The speech from the throne intimated that legislation would be brought down to assist the coal industry, and the coal question was one of the subjects discussed at a conference of the coal industry held in Ottawa last week.

A statement to this effect, made by Hon. R. W. Craig, attorney-general, in concluding an address on the "liquor situation in Manitoba" before the U.E.A. convention here, and interpreted as foreboding a referendum on the proposed "beer bill," a petition for which is being circulated throughout the province. A further exhortation to "keep the liquor question out of the sphere of political influence" was construed as indicative of the provincial government's intention to forestall possible action by any other political party to adopt a liquor plank in their election platforms, by definitely committing itself to a pledge that the people should decide.

Mr. Craig also intimated that certain preliminary questions were to be submitted by Manitoba to the customs commission when it sits in Winnipeg.

He indicated that when the customs commission met in Winnipeg, the province would make a submission urging reductions in the customs and excise duties and taxes to enable government agencies to compete successfully with the bootlegger.

Consolidation of powers. Previous on a third address, a matter which he stated was within the powers of the federal authorities, also would be suggested to the commission. In the latter case, joint federal and provincial action was necessary to meet the situation.

Commenting on criticisms of the provincial government's handling of the liquor situation, Mr. Craig stated that "at no time in the history of Manitoba has as much money been spent, as many men employed, and as great effort exerted in the administration and enforcement of the liquor laws of this province as during the past year."

Referring to the beer situation, the attorney-general said that "seventy-five per cent of the beer consumed in this province is now due to the illicit sale of beer, and the most of that is due to the brewers who furnish the supplies and abuse the privilege granted to them under the government liquor control act."

## Urge Expulsion of Chinese

Suggested as Counter Measure by Service League at Victoria.

Victoria, B.C.—Confiscation of property owned by Chinese in Canada and expulsion of all Chinese from the country is advocated in a resolution that the Britannia post of the Canadian League of the British Empire Service League passed and will submit to the Dominion convention at Winnipeg this month, with the request that such recommendations be made to the federal government. ## Trade Relations Are

Not Satisfactory

Imports From Canada Much Greater Than Exports Says New Zealand Premier

Montreal, Que.—On arrival here, Premier J. G. Coates, of New Zealand, said that the trade relations between his country and the British dominions should bear their full share of the cost of imperial defence.

Like Premier Bruce, he will cross the continent during his return from the Imperial Conference in London to his home and will stop off in various Canadian cities.

The immediate interest of the New Zealand premier at the moment is apparently centered in matters of trade and industry.

"No," he replied emphatically, when asked if his country was satisfied with present trade relations with Canada.

"We import five times as much volume as we export to you," and he intimated that this, naturally, could not be satisfactory.

The disparity was not good for trade, he thought. When a balance went against one country heavily it was natural there should be a tendency towards decrease of trade with the favored party. Therefore, it was to the interests of both countries to make the balance more equitable.

"We want to trade with the empire," he said.

## BELIEVES BRITISH EMPIRE IS GREAT POWER FOR GOOD

Victoria, B.C.—Premier Stanley Bruce, of Australia, in a foreboding and characteristic farewell speech before the Canadian Club at a luncheon here, dealt with the purpose of the recent Imperial Conference and then urged Canada to assume its full share of responsibility in providing defence for the Pacific.

"We can now go forward with confidence that we have got rid of one of the things of great danger to the Empire, and that was the inferiority complex which existed in some of the Dominions," Mr. Bruce said in dealing with the results of the Imperial Conference.

"In Australia we have never suffered from an inferiority complex," he said, "and we are not likely to do so in the future."

But now the Dominions have been told that they are all just as good as British and as good as one another.

"The British Empire is not a thing of fortuitous circumstances, but a great power for good that was predestined. Many people believe that this Imperial Conference was to have been a conference at which the death knell of the British Empire would be rung."

I went there with the idea that the conference did not press the breaking up of the British Empire, but that it would make in a new era when the world would have a greater desire for union and desire for co-operation with the Empire. This Imperial Conference has done much for the consolidation and unity of the British Empire for years to come."

## League Of Nations

International Friendships Being Cemented at Geneva Says Margaret Bondfield

Ottawa.—"The nations have reacted the stage of public conscience where they recognize war for the villain and disgusting thing it is," said Miss Margaret Bondfield, Labor member of the British House of Commons, addressing a large gathering here on the subject of world peace, and the relation of Labor to that aim.

"We can only assure world peace through a real League of Nations," she added, "and in that League there must be no room for the victor and the vanquished."

Miss Bondfield, who spoke under the joint auspices of the Ottawa Women's Club and the Ottawa Women's League, was the guest of honor at the gathering by Hon. Peter Heenan, Minister of Labor, who welcomed her in the name of the Dominion Government and the people of Canada.

"The British Empire," she said, "whether represented by man or woman, is accountable proper place at Geneva."

There was being developed largely through international Labor conferences at that place, an international mind, and a spirit had been made in international Labor legislation. International friendships were being cemented and employers and employees of the world were finding "not far" they are apart but how much they have in common."

**Lieutenant Governor Sworn In**  
Toronto.—In the presence of a few personal friends, judges, representatives of the Toronto city council and other Ontario cabinet ministers, His Honor W. D. Ross was sworn in as Lieutenant Governor of Ontario in the legislative chamber at the Parliament Buildings. The oath was given by D. J. Lennox, clerk of the executive council. Mr. Ross succeeds Henry Cockburn, Lieutenant Governor, since 1921.

**Leaves for England**  
Edmonton.—Hon. Herbert Bondfield is sailing from New York on the 22nd for London, where he will take up his work as overseas emigration agent for Alberta. He will be accompanied by Hugh Baker, former private secretary to the premier, who will be associated with him as secretary in his London office. Mrs. Bondfield and Mrs. Baker and family will also be in the party.

## Pas Prepares for Dog Derby

The Pas, Man.—The Pas, and district has commenced preparations for its yearly feat—the dog derby and winter carnival.

Each week commences January 25 and some five or six dog teams, which have gained fame in eastern Canada and United States winter carnivals, are being shipped into shape.

## Was British by Birth

Bayreuth, Bavaria.—Richard Stearns Chamberlain, husband of Hon. Stuart Bayreuth's daughter, Eva, is dead. He was 72 years old. He had been a German citizen since 1914, but he had joined the extreme nationalists.

## Britain Forges Ahead

Imports From Canada Much Greater Than Exports Says New Zealand Premier

Montreal, Que.—On arrival here, Premier J. G. Coates, of New Zealand, said that the trade relations between his country and the British dominions should bear their full share of the cost of imperial defence.

Like Premier Bruce, he will cross the continent during his return from the Imperial Conference in London to his home and will stop off in various Canadian cities.

The immediate interest of the New Zealand premier at the moment is apparently centered in matters of trade and industry.

"No," he replied emphatically, when asked if his country was satisfied with present trade relations with Canada.

"We import five times as much volume as we export to you," and he intimated that this, naturally, could not be satisfactory.

The disparity was not good for trade, he thought. When a balance went against one country heavily it was natural there should be a tendency towards decrease of trade with the favored party. Therefore, it was to the interests of both countries to make the balance more equitable.

"We want to trade with the empire," he said.

## Bandits Commit Atrocities

Thousands of Chinese Villagers are Slain in Interior Province

Shanghai.—Missionaries state that bandits have massacred many thousands of Chinese villagers in interior provinces of China during the past year.

A missionary who arrived here from a district near Wanchingpoo, the Shantung province village where the entire population 1,000 was reported to have been murdered by bandits for robbing their entrance, said that such affairs were common.

Along province, where rival military forces contended for months, lives suffered need for humanity.

It is village which the slightest resistance when bandits appear, said the missionary, every man, woman and child is mercilessly slaughtered.

These misadventures sometimes are accompanied with unspeakable horrors.

## Russia To Buy Horses

Will Purchase From 2,000 to 5,000 for Military Purposes

Edmonton.—A special commission from the Russian government will be in Western Canada in the spring of 1927 to purchase from 2,000 to 5,000 head of horses for military purposes, according to an announcement made at a meeting of the Alberta Provincial Horse Breeders' Association by R. E. Wilson of Calgary.

Dominion government horse promoter for Alberta, these horses, it is said, will be of a class which can very easily be spared from Alberta ranges as they are of smaller size and poorer quality, and horses are very plentiful with the opening of the market for stock of this kind.

**Canada's Jubilee**  
Ottawa.—Canada's diamond jubilee celebration, to be held in July next, has been causing the attention of the cabinet, and an inter-departmental committee is being appointed to make preliminary preparations for the event. Announcement to this effect was made by Premier Mackenzie King at the conclusion of meeting of the council.

## Suggest Use For Liquor Profit

Might Form Fund to Help Pay Old Age Pensions

Ottawa.—Some discussion has been aroused in the capital by the suggestion made in the cabinet that the profits from the Highway Industries, expressed the opinion that when the Old Age Pension Bill is reintroduced it might assign to the provinces a somewhat larger share of responsibility for old age pensions, with the idea that profits from provincial Government control of liquor would furnish a fund for that purpose. This suggestion, through a misunderstanding, was attributed to press dispatches by W. E. Best, another member of the delegation.

Premier Mackenzie King did not commit himself on the point beyond remarking that it was an interesting suggestion.

## Will Not Amalgamate

United Farmers of Manitoba Defeat Motion to Join Farmers' Union

Portage la Prairie, Man.—The United Farmers of Manitoba in convention here voted down a resolution proposing that the organization follow the lead of the Saskatchewan farmers and open immediate negotiations for amalgamation with the Farmers' Union of Canada. The vote was overwhelmingly against the resolution, which was offered as an amendment to a proposal that the United Farmers of Manitoba discontinue their discussions with the Farmers' Union and co-operate with that body toward any plan which might be of benefit to the farmers of the province.

A division of opinion developed when the proposed amalgamation of the two bodies was under discussion.

## FARM PROBLEMS ARE DISCUSSED AT CONVENTION

Saskatoon.—With fully 150 delegates attending, the Saskatchewan Agricultural Societies convention was held in the Convention Hall of the University here, J. P. Robinson, Cullis, president, presided over the proceedings.

At the address in the absence of J. P. Robinson, of Russell, Saskatoon, president, with whom several speakers expressed sympathy and best wishes for a speedy recovery.

Sickness also prevented the attendance of Dr. W. C. Murray, president of the university, whose place in welcoming the delegates was ably filled by Dean W. C. Butterfield, of the College of Agriculture.

Mr. Robinson reviewed the outstanding agricultural events of the year, pointing to the improvement in general business conditions as indications of the general situation, looking back to a more solid foundation than during the years following the war.

Dean E. A. Howes, of the Alberta College of Agriculture, who is one of the principal speakers at the convention, gave an address on "The History and Development of Agricultural Societies and Fairs." His speech was interspersed with wit and humor and on more than one occasion he dared to warn the delegates that they were going to laugh when he told his story.

Dr. William Allen, professor of farm improvement at the University of Saskatchewan, created a stir among the delegates when he revealed that a survey of farm management in the Belknap and Melrose districts during the past summer led to the conclusion that the majority of farmers in those areas succeeded in spite of their management of their farms and because of the wonderful soils and other favorable conditions.

Mrs. Margaret Macdonnell, director of the Western Agricultural Society, created a good impression in an address on "Exhibitions from the Women's Standpoint."

Dean Butterfield reviewed the various ways in which the different university departments are trying to assist agricultural development and progress throughout the province. In discussing the work of the animal husbandry department, he pointed out that a Yorkshire boar and sow sent to the United States had won money and their progeny took a first prize in the 1926 Chicago International Live-stock Exposition.

Dean Butterfield told the delegates to get better bills planted ready to receive plum and cherry seedlings now being grown at the university. Several thousands of young plum seedlings were growing in the grounds and they were waiting to see the fruit. Also they were growing 40,000 apple seedlings and 2,700 cherry seedlings.

## Gains Inspiration at Banff

Rudolph Friml, famous Austrian composer, has gone to Banff to gain inspiration for the score of the "Squaw Man," a new musical comedy which he is at present working. "Roo Marie," one of Friml's most recent successes, has popularized this young composer with the musical and theatrical world. The "Squaw Man" became widely popular through the interpretation of the actor, William Faversham.

In the accompanying photograph Mr. Friml is shown fingering a small key-board. It is an invention of his own and upon it he works out many of his compositions, while travelling overland where a piano is not available.

## Proper Business Methods Needed in Agriculture

Saskatoon.—The importance of applying business methods to agriculture if farming is to be a success was stressed by Wm. Allen, professor of farm management at the College of Agriculture in his address on "The Farm Business in Saskatchewan" at the annual convention of the Saskatchewan Agricultural Societies here.

At the outset Mr. Allen made it clear that farming was not a simple business and pointed out that the agricultural profession was the outcome of sheer necessity. As civilization became more and more complicated improved methods of cultivation became more imperative.

Continuing, the speaker showed how the increased demands of a modern civilization had resulted in the replacement of the old methods of farming by the method of farming by the fertilizing crop. Then the became rotation had its day but was gradually replaced by the field grass husbandry. Later came the scientific rotation.

"It should be observed, continued the speaker, at this point that the method of farming by the fertilizing crop has been varied with different regions. In some cases early crops have been omitted. At the present time, examples of many types can still be found in some parts of the world. Our prairie agriculture is still in the 'fallow' stage, although we find some indications of departure from it.

"Modern agriculture is vastly different from early agriculture. Self-sufficiency has passed and now specialization and exchange prevails. Our farm income is obtained from our sales of surplus commodities. This surplus is sold on a cash market, the proceeds of the sales being used to obtain commodities from other lines of agriculture, or industry in general."

**Registration of All Able-Bodied Men**  
For Military Service

Moscow.—The general prevalence of war talk in Russia coincides with the registration of all able-bodied men in the classes of 1925 to 1926 for possible military service.

Great Britain's openly unfriendly attitude to the Soviet; Poland's uncertain destiny; the disquieting situation in Lithuania; the U.S. policy of non-interference to Moscow and other adverse signs on the Bolshevik horizon have given rise to increasing talk of war.

While this war scare is found largely among the masses, important business officials, such as Nikolai Dubinin, of the Communist executive, do not hesitate to express openly their anxiety over Europe's intentions and unhappiness are also reflected in the Soviet press where such bellicose tendencies everywhere.

## To Deal Firmly With China

British Government and Other Powers to Defend Treaty Rights

London.—The Daily Sketch states that the British Government has decided that any attempt by the Chinese to nullify the British settlement in Shanghai, as was done at Hankow, will be met "with all the force available."

The United States, France and Japan, it adds, have already determined to defend their treaty interests in Shanghai if attacked.

A big concentration of warships in Chinese waters is to be expected, it is concluded.

## Pay Final Tribute

Winnipeg.—Final tribute to the memory of a pioneer of the prairies, to one who had braved the hardships of the early days of Western Canada in lining the vast stretches with railway communications and in developing the natural resources, was paid when hundreds of prominent citizens and business associates attended the funeral of John H. McArthur, railroad builder, who died here recently.

## Wage Dispute Settled

Montreal.—The wage dispute between 35,000 maintenance of way men members of railway unions and employed on Canadian railways and the railway companies, has been settled by the granting of an increase in wages based on a two-cent an hour raise. It was announced by the Railway Association of Canada. The men asked for an increase of ten cents an hour.

Workers excavating near Lake Zurich, Switzerland, recover unearthed remains of dwellings which date back to the Stone Age, more than 7,000 years ago.

## Antwerp Honors Canadian Pacific Ship

(1) Street in Antwerp near the port. In the background is the famous cathedral.  
(2) On the bridge of the Melita, W. D. Grosset, managing director, Canadian Pacific, Belgium; Captain A. H. Notley, of the Melita; and Mayor van Cauwelaert, Burgomaster of Antwerp.  
(3) Canadian Pacific liner Melita.

Honor was brought to the British shipping world and more especially to the Canadian Pacific liner Melita when on November 14th, she steamed into the harbour of Antwerp and was the 10,000th ship to enter that great port during the year. It created a record for the number of ships docking at any European port with the sole exception of London, during such a period.

The occasion was marked by fetes throughout the city in which the whole population of Antwerp took part. Telegrams of congratulation were sent by notabilities from all over Belgium including one from King Albert, and there were great parades of labor, industrial and commercial organizations in the principal streets. In response to the welcome given the Melita by the city, W. D. Grosset, Managing Director for the Canadian Pacific in Belgium, organized a luncheon aboard the vessel. He was assisted by Capt. A. H. Notley, commander of the ship, and officers. The guests included Mayor Van Cauwelaert, Burgomaster of Antwerp, with several of the Aldermen; Consul-General Rowley, for Great Britain; and a large number of the shipping, commercial, industrial heads of the port. Mr. Grosset in his address of welcome said he was proud to think that

S.S. Melita was the 10,000th ship to enter the port of Antwerp since the beginning of the year, both because she flew the British flag and because she was a Canadian Pacific ship. He pointed out that this vessel, the S.S. Minnedosa, the S.S. Montclair and the S.S. Montclair all used the port and during the current year had carried over 10,000 passengers.

Burgomaster Van Cauwelaert read a telegram of congratulation from H.M. the King of Belgium. It was as follows: "I thank you for your thoughtfulness in communicating to me this happy news, and I send to the city of Antwerp with my heartiest congratulations, my sincerest wishes for the ever-growing increase of traffic of the port, most important factor in the prosperity of the country. (Signed) Albert."

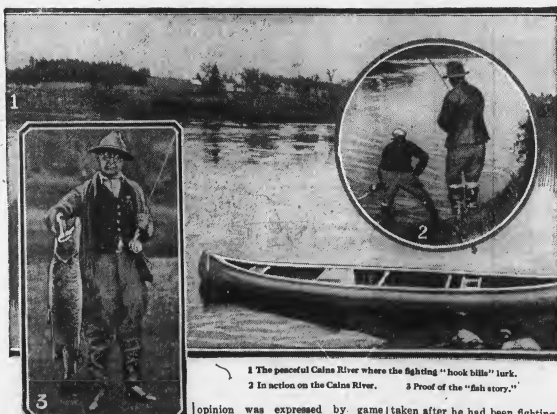

Consul-General Rowley said that 10,000 ships within a period of ten months and a half constituted a record for any European port, London excepted. The port was the outlet for an interior navigation throughout the country that represented a total of over 10 million tons. About the same tonnage represented ocean-going vessels using the

port. Its reputation was very high in shipping circles all over the world. Capt. Notley also addressed the gathering in a humorous speech which closed the proceedings.

At night Captain Notley, his officers and crew were entertained at the City Hall at a reception tendered by the Mayor and Aldermen at which Governor Baron Holvoet, Camille Huysmans, Minister of Science and Arts, members of the consular bodies and leading shipping and commercial men were present. Mayor Van Cauwelaert read a telegram from M. Jaspard, Prime Minister of Belgium, announcing that Mr. Grosset and Harbor-Master Captain Stocker had been nominated Knights of the Order of King Leopold. The Mayor in his address took the opportunity to express to the Canadian Pacific Railway his sentiments of esteem and gratitude for a company which in the past twenty years had been a regular customer of the port. He then handed over to Capt. Notley the present given by the city to the crew of the 10,000th ship to enter the port in 1928.

Capt. Notley and the leading guests then wrote their names in the Golden Book of the City of Antwerp.

## A Record Fish and Story

1 The peaceful Calne River where the fighting "hook-bill" lurks.  
2 In action on the Calne River. 3 Proof of the "fish story."

W. E. Kidder of Kalamazoo, Michigan, arrived in Montreal over Canadian Pacific Railway lines, recently with the best "fish" story of the year. It was a pretty good story, and we had to believe him, especially when he showed us a forty-pound salmon packed away in ice in the observation car.

Now, Mr. Kidder is a pretty good fisherman, but he says that the experience he had while fishing in Calne River, New Brunswick is absolutely unique, and that as far as he knows he was successful in hooking what is probably a record salmon with a trout rod and fly.

"This fish is unquestionably the largest hook-bill, I have ever seen," said Mr. Kidder, "and the same

opinion was expressed by game wardens who viewed the fish in the live box. But the really great point was the terrific fight that this fish put up. This was so spectacular and so fast and furious, accompanied by such a series of jumps, that we had no time to take a picture of it.

My canoe man and myself were busy every second of the time from twenty minutes past four until after dark. In fact up to the last few minutes of the fight I stood with one foot in the bow of the canoe constantly, when I was not in the canoe and chasing the fish back and forth across the stream.

"This fish was forty-five and three-fourths inches long measured in a straight line. If measured around the contour of the body it would probably show two or three inches longer than this. These measurements were

taken after he had been fighting the wires of the live box for five or six days, in which he undoubtedly lost a great deal of weight. Perhaps if he had been measured when first taken from the water he would have been at least two inches more.

"However, no matter how you look at it, he was big enough to suit me, and the fact that it was a 'hook-bill' and 'leaping fish' instead of a female or 'sulker' gave me that much more satisfaction. Then, too, it was taken with a No. 15 fly, which is very much smaller than is commonly used for six inch trout. The rod weighed only four and seven-eighths ounces, and the ordinary trout leader, with a three pound breaking strength was not much heavier than is commonly used for a small trout fly."

## Say It With Flowers

When you require flowers artistically arranged for any occasion, at moderate prices, and of unexcelled quality, phone No. 13, THE COLEMAN TRADING CO., LTD., agents for Frache Bros., Lethbridge. advt.

## Voice Training &amp; Pianoforte Tuition

# The Growth Of Motor Travel Responsible For Greater Interest Now Taken In National Parks

The 1926 summer season witnessed the establishment of new records in the number of persons visiting the Canadian National Parks.

While this increase was general, it has been most noticeable in the matter of motor tourists. Advances made in the automobile industry and in the construction of good roads have brought corresponding advances in the growth of motor travel, until this traffic has become of great importance in the development of the country.

Highways play an important part in drawing a large number of the tourists who visit Banff and Kootenay National parks by motor. Through the Kananaskis gateway, which is the eastern entrance to the Banff park and the Hudson Hot Springs gateway, which is the western entrance to the Kootenay park, there passes each year the greater part of the motor traffic to the Canadian parks in the Rockies.

The volume of motor traffic poured into these two parks by motor is shown by the registration. At the Kananaskis gateway at the end of October of this year 19,060 motor cars had been registered as following at Hudson Hot Springs gateway, 6,593 entries were recorded, making a total of 25,653 cars entering the two parks. This number shows an increase of 6,750 over the number recorded in 1925.

Waterton Lakes National Park, in Southern Alberta on the international boundary, drew an amount of tourist travel far in excess of the previous year. The possibilities of this scenic wonderland are accentuated by the plans for extensive development announced in 1926.

The opening in June, 1926, of the motor road extension from Lake Louise to Pelly through Yoho National Park for the first time into prominence in the motor tourist world. The further extension of this road, which will enable motorists to proceed through Golden, is expected to be opened to travel early in 1927.

Jasper National Park, in the northern part of Alberta, had a most successful season, nearly 7,000 hotel registrations having been recorded prior to the end of October.

The National Parks of Western Alberta, which, draw more visitors than in former years. A very keen interest is being taken in all countries, particularly in Canada, in the United States, in the efforts of the Canadian Government to preserve the buffalo and also in the experiments that are being conducted at Buffalo Park in cross-breeding.

## Alberta Fur Production

Beaver Trapping is Now Permitted Under Certain Restrictions

Two million dollars and counting over represents the money value of Alberta's fur production for the year 1925-1926, according to Provincial statistics. The value figures are \$2,127,750 as against \$2,058,717 for the year before. Beaver trapping will be permitted, under an order-in-council just issued, throughout the upper part of the province, north of the 55th parallel. Within these bounds the close season, which now holds for the whole province and for the whole year, will be opened for four months, January 1 to April 30.

## Saskatchewan Aerial Service

Government Geologists to Make Intensive Investigation of Northern Area

An aerial survey of Northern Saskatchewan is to be made, preliminary to an intensive investigation of the region by Government geologists. Specially constructed airplanes will be used and a three-year programme of mapping the country has been planned. The work is being undertaken as an aid to mineral development. Gasoline and general supply stations are being set up at convenient points.

Agriculture on the Up Grade. Agricultural progress in Saskatchewan is on the upgrade. During the past few months land sales have been brisk, half of the purchases being of raw, unbroken farms. Wholesale implement dealers of the province all look for a big year of farm production in 1927. One implement dealer states that he has now more orders for spring delivery than the total of his 1926 sales.

In September 2,465,500 pounds of fish, valued at \$110,000 were landed on the coasts of northern Ireland.

Present a small boy with a watch and he'll have the time of his life.

W. N. T. 1927

## Model School is Started

Children of Wembley Hill Learn Under Ideal Conditions

The last word in elementary schools—Wembley Hill Council School, Highwood, Wembley—was formally opened a few days ago by Sir Percy Jackson, chairman of the West Riding of Yorkshire Education Committee.

Lucky children of Wembley Hill. They go to a school in which Middlesex Education Committee have incorporated all the newest ideas in design, furniture, health and happiness. There are spray baths where every child can have a bath once a week. The children under six in little cubicles ranged round the wall, and then step on to "dickboards" under the warm sun.

No child has a bath until the consent of the parents has been given. An unusual feature of Wembley Hill, which is a mixed school of boys and girls, is that it is directed by a woman, Miss A. J. Hayes. A remarkable personality, she has been successful at other schools and it is clear that she is getting distinctive "atmosphere" at Wembley. The school is divided into "houses" on the public school model.

There is little discipline of the old fashioned kind. The word "punishment" is not known in the school. Miss A. C. Evans, headmistress of the junior school, strongly objects to the word. "What we aim at here," she says, "is to get everything possible out of the child rather than to force everything possible into him. The mere giving of information is not education."

## Wealth Of British Columbia

Basic Industries Will Have Outcrop This Year Valued at More Than a Quarter of a Billion Dollars

British Columbia's basic industries will have an outcrop this year valued at considerably more than a quarter of a billion dollars. This represents an enormous increase over the figure of five or ten years ago and indicates that industrial progress in Canada's Pacific coast province is maintaining an almost phenomenal stride. The estimate of the value of the year's production by industries is as follows:—Lumbering and related forest industries, \$30,000,000; mining, \$70,000,000; agriculture, \$70,000,000; fisheries, \$24,000,000; pulp and paper, \$15,000,000. In ten years there has been an increase of 264 per cent. in the lumber industry; manufacturing has advanced 214 per cent.; the increase in the volume of lumber export has been 500 per cent.; and farming has gained 75 per cent.

## Develop Reindeer Industry

Development of an extensive reindeer industry on the plains of the Mackenzie River basin is believed to be started by the formation of the Dominion Reindeer Co., Limited, a concern capitalised at \$500,000, with headquarters at Vancouver, according to the Morning Star.

During the first four months of last year 175 persons were killed and 6,612 injured in traffic accidents in London.

## Prince Inspects G.P.R. School Car

One of the Canadian Pacific school cars in Northern Ontario.

His Royal Highness Prince George, like his popular brother the Prince of Wales, proved that he is highly democratic; that his interests are diversified; that the education and welfare of the people of the Empire are matters of serious personal consideration. During his recent journey across Canada on the Canadian Pacific he had a long drive through the English to spend Christmas with the Royal household. Prince George was informed that the train was nearing Devon, a remote settlement on the Canadian Pacific in northern Ontario.

## Saskatchewan Poultry Pool

Twenty-six Carloads of Dressed Birds Were Handled

Announcement of the final payments on the Christmas poultry pool, in which 26 carloads of dressed birds were handled, yielding returns totalling \$143,394.18 to the producers, were announced by the Saskatchewan Poultry pool following the meeting of the directors.

Chickens will be prepared immediately, and the payments will be sent out on the following basis:

Turkeys—Specials, 25 cents a pound; No. 1, 32 cents; No. 2, 26 cents. Chickens—Specials, 23 cents a pound; No. 1, 21 cents; No. 2, 17 cents. Poultry—No. 1, 18 cents; No. 2, 14 cents. Ducks—No. 1, 16 cents; No. 2, 13 cents. Geese—No. 1, 16 cents; No. 2, 11 cents.

Edith Bright, general manager of the pool, pointed out that all shipments were made at flat rates on a quality basis, light birds being paid for at the same rate as heavy birds, if they had the necessary quality and finish.

A large percentage of the birds shipped by the pool graded special and No. 1. Mr. Brightly attributed this to proper feeding and housing. A. C. Evans, headmistress of the junior school, strongly objects to the word. "What we aim at here," she says, "is to get everything possible out of the child rather than to force everything possible into him. The mere giving of information is not education."

## Paper From Straw

Wrapping Paper and Cardboard to be Manufactured at Edmonton Plant. Newspaper from straw will not be turned out by the Edmonton plant, now being installed, in the initial stage. Wrapping paper, cardboard and other coarse papers will be manufactured at the outlet. As the business develops it is planned to establish plants in other western cities. The Alberta Government is interested in the matter and has favored extensive experiments, conducted to a successful finish, by Dr. Rache Wilg, who was connected for a considerable time with Dominion Government's paper from straw plant in the McGill University grounds, Montreal.

## Final Crop Estimates

Final estimate of the Northwest Grain Producers' Association places the wheat crop of the three Prairie Provinces at 371,315,000 bushels. Oats are put at 310,500,000; barley at 61,500,000; rye, 8,704,000, and flax 5,648,000.

Friend—"So you've invented a parachute and intend to test it out yourself? What if it doesn't work?" Inventor—"I'll improve it until it does, if it takes ten years!"

# Envisions The Time When Western Grain Will Go To Europe By Northern Route

Capture Queer Animals For American Museum

Odd Manners and Customs of Lemmings Told by Noted Explorer

The Lemmings of Norway were supplied at the Waldorf Astoria hotel, New York. Strange things were told about them, but the Lemmings didn't mind at all, for they are dead. More, they left immediately to spend the next thousand years or so in a case at the Museum of Natural History.

To learn of the curious behavior of these Lemmings, and their odd manners and customs, a man does well to talk with Carvel Webb, the explorer who found talking fish in the Malay jungle and has now brought over from the north country these inexplicable creatures, the first of their family ever seen in America. The Lemmings are known as "mystery" animals.

Scarcely five inches long, rather like spotted guinea pigs in appearance, they live in a singular cycle which ends with suicide.

The Lemmings were taken on November 19, during their periodic migration to the sea. These migrations occur at intervals, and when one is ended the Lemmings vanish altogether until the scheduled time for the next one arrives. In Norway the great trek of the Lemmings is made once every 25 years. If you miss them then, you will have a long time to wait.

When a migration occurs, a few Lemmings, smaller than the rest, Mr. Webb says, or somehow out of the common crowd, refuse to go on the fatal journey. These curl up into hardy living balls of fur and, after a long winter sleep under the snow, eventually find their way up into the mountains. Thus the race is preserved from absolute extinction.

When the Lemmings start for the sea, nothing can stop them. To keep themselves fit for their fate, they eat four times their own weight in food every day. Moving in vast hordes over the fields, they devour every blade of grass, every herb, every root of weed, every moss for miles along the way.

They fight the cattle and the reindeer for their forage, and the cattle cannot stand against them. In the Norwegian villages they have a saying: "The cows are coming home." That means the Lemmings are passing by. They climb mountains, swim rivers, jump ravines.

And when the Lemmings come at last to the sea, what do they do? The leader plunges in, and the millions plunge in after him, and they swim on and on till they can swim no more and drown.

Why do the Lemmings do this? Nobody knows. But Mr. Webb will tell you that the north country, the old people will say: "They are going to find the lost continent of Atlantis."

## Preference Given To English

Has Supplanted French as Official Language of Soviets

English has supplanted French as the official foreign language of the Soviet government. From George Tchardin, the Soviet foreign minister, down to the humblest clerk, almost everybody in the Soviet foreign office speaks and writes English. In some of the universities English is a compulsory subject, while in several government departments it is an absolute prerequisite to employment.

English has also superseded German in popularity among the masses, and it now is taught in nearly all the schools. Special classes are organized by the government, in workers' clubs and elsewhere.

Members of the old nobility and aristocracy need never lack good recreation and comfortable living if they know the English language. Thousands of them are engaged as teachers and interpreters. Most government documents now are issued in Russian and English. The only exceptions are those on Soviet-Russian relations, by the state, is issued in the English language.

## The Marquis of Anglessey

Another name has been added to the already long list of titled English nobles who have invested in land and in development enterprise in Alberta. It is that of the Marquis of Anglessey, Charles Henry Alexander Targat. He has inherited himself in the ownership of the title of Lord of the Manor of St. Lawrence, near Calgary.

Taliesin a man has some knowledge of figures he doesn't count.

Hudson Bay harbors are the focus in the world and Hudson Strait is fraught with far less danger to navigation than the St. Lawrence from Montreal to the sea, said Capt. Robert A. Harrison, Arctic Explorer, in an interview in Chicago.

Captain Bartlett, who was a member of Peary's North Pole expedition, envisions a time when the gale, not only of Canada's prairie province, but of the Northwestern United States, will go to European countries by the northern outlet with a great assembly point in Saskatchewan, probably at Saskatoon.

For ten or five months of the year Hudson Strait is the safest body of water to navigation in the world," he declared. "There is almost perpetual daylight; there are no fogs such as we encounter in the St. Lawrence, and 'Why doesn't Canada wake up and enshrine the Hudson Bay route and provide an outlet for products that will have Canadian producers millions in mind handling goods to the world? It is because of political opposition in Ontario and Quebec. I don't know any real seaman who would not be glad to sail Hudson Strait."

Captain Bartlett mentioned a plan, hatched in the United States, whereby service via the "top of the world," linking European, Canadian and American cities to the Orient with ships flying over the Arctic wastes.

With this purpose in mind, he is preparing to make two Arctic surveys, by air and land. In this he expects to receive aid from the United States or Canadian governments. Selection of suitable landing fields, one or more of which would be in Canada, possibly at Regina, would be an important part of such a plan.

"With such an arrangement in the Arctic and an agreement between British and the United States, whereby the British navy would police the Pacific and the American fleet the Pacific, English-speaking races need never fear Oriental world domination," he said.

Captain Bartlett is a survivor of the days of wooden ships and "iron men." He is a Newfoundland by birth, descended from a long line of navigators and sea hunters. He was captain of the H.M.S. Karik, lost on a Canadian Polar expedition some years ago. The crushing of the Karik in the ice and Bartlett's leadership in guiding the crew to safety in a long trek to the mainland, the Herald's Gazette, are written in the pages of Canadian history.

## Will Soon Rival Radio

Television Machine Makes Possible View of Public Events

J. J. Balz's television machine has been demonstrated in London before the scientists of the Royal Institution. As previously announced, Balz's new invention, utilizing infrared rays, does away with the hot, objectionable searchlights formerly necessary to illuminate the subject; now the subject can sit in total darkness under the invisible infrared rays, while every motion can be clearly seen by observers sitting in another room, also in darkness.

Although all movements are distinguishable, the images projected are not yet sufficiently clear to distinguish the features of the subject.

It is predicted, television will soon be in popular use equal to that of the radio, with a television set in every home to receive, from central broadcasting stations, views of athletic contests and plays in conjunction with the present audible radio.

## The Size of Canada

How big is Canada? The answer to such a question probably would be the geographical dimensions. A better answer would be that Canada is big enough to give to every young person as great an opportunity as is available in any other country, granting that there are no appreciable mistakes, or commission or omission in government.

Silver furs are now being shipped from Alberta to New York, New York, where they will start breeding pens. The fur industry has assumed very considerable proportions in Alberta during the last five years. Another novel industry is the raising of Karakul sheep. (New York Times, Feb. 18, 1926.)

Learning the Bible by heart is the self-imposed task of the 46,000 members of the Berean Band of Bible Learners. The movement is 31 years old and was originated in Arden, Tennessee.

WORLD HAPPENINGS  
BRIEFLY TOLD

The French Chamber of Deputies, for the first time in history, elected a socialist as its president.

European nations have been hit hard by financial depression, according to Dr. George P. Merrill, of the department of geology of the United States National Museum. British nations are suffering the least, he said.

Two million dollars and something over represents the money value of Alberta's oil production for the year of 1925-26. The exact figure is \$2,122,780, against \$2,020,174 for the year before.

The Old Penitentiary Bill will be re-introduced this session. Premier W. L. Mackenzie King told a delegation of railway brotherhoods' representatives which met the Premier and members of his cabinet recently, to recommend legislation.

Montreal resumed its position during 1926 as North America's premier grain shipping port. New York ran a poor second almost sixty million bushels under Montreal's total figure of 124,418,831 bushels. California, Tex., was third with 21,265,000.

The Greek Government is preparing a request to the League of Nations for assistance in obtaining a supplementary refugee loan in March, when the government hopes to present a balanced budget, and request military estimates.

Vancouver's population increased by 9,000 during 1926, according to the annual census taken by the city assessment commission and now stands at 137,397. The total assessment of the city is now \$125,518,960 and the improvements \$89,762,960.

A record for a single day's transit through the Panama Canal was established last week when 28 commercial vessels passed through the waterway, eleven from the Atlantic to the Pacific and twelve the other way. The toll for the day was approximately \$125,000.

Cadet Richard E. Terrell, 22, and Charles Shultz, 22, both members of the attack section of the advanced flying school at Kellyfield, San Antonio, Texas, were killed instantly yesterday when their ships collided at 1,500 feet altitude, and fell to earth in tail spins.

Probably \$35,000,000 will be spent on the highways of Canada in 1927. Wilfred LeFebvre, of the Dominion highway department at Ottawa, told delegates to the American Roadshow convention at Chicago. He said that Canada now has 400,000 miles of roadways, and 51,000 miles of gravel or better roads of which \$600 have been improved by federal aid, and others by provinces.

## Flowering Perennials

## For The Prairie

Many Varieties Can be Depended Upon to Give Good Results

Many of the most beautiful varieties of perennial flowers can be depended on to give thoroughly good results in southern Alberta. Experience in cultivating them at the Lethbridge Experimental Station leads the superintendent to recommend to everyone who owns a garden the planting of some perennials.

At the Lethbridge station a succession of bloom during the whole summer was secured, commencing in the spring with the Iris and ending with the Golden Glow. The perennials recommended are the Iris, Phlox, Columbine, Lysichiton, Pyrethrum, Oriental Poppy, Iceland Poppy, Delphinium, Shasta Lily, Coreopsis, Michaelmas Daisy, Campanula, Lupinus, and Golden Glow.

If carefully set in good soil these perennials require comparatively little attention for years, except a winter mulching of stable manure and summer cultivation. If new plants have come too crowded Mr. Fairbairn, the superintendent of the station, recommends that they be lifted in the fall, divided up and pieces replanted.

## New Road Proposed

Requests that the British Columbia government press forward a road from the coast to connect with the highway now leading from Edmonton to Jasper National Park, was urged upon Hon. W. H. Butterfield, minister of public works, at Victoria, by K. A. Blatchford, M.P., for West Edmonton.

Julian—"An automobile dealer sold me a new today."

Joan—"Any accidents?"

Julian—"Yes, my wife and family hit by him to put it over."

Mr. Grim—"I want something quiet in a hat—nothing extreme."

Salesman—"Well, if you want something conservative how is this yellow hat with the green polka dot band?"

W. N. U. 1664

Scotland Yard Has  
Record Of Records

Every Crime is Catalogued and Each Division Extensively Sub-Divided

In every capital there exists a criminal record office where are tabulated thousands of sets of fingerprints, thousands of photographs, and detailed descriptions of criminals, male and female. The tabulation is amazingly complete in the Record Office in Scotland Yard, there is a sort of record of records, in which about a thousand classes of crime are catalogued.

The main divisions are "Arson," "Burglary," "Counterfeiting," etc., and these are extensively subdivided. There are, for instance, forty different divisions under "Burglary," and no fewer than one hundred and seventy-five under "Fraud." The criminals who commit these various crimes are also classified according to their looks and personal peculiarities. If a criminal is committed, if the criminal is one who has already been in the hands of the law, his identification is only a matter of time, and, as a rule, not of days.

Still, the man may have had time to leave the country, in which case the cables are busy, and his description, with all identifying marks, is telegraphed all over the world. The messages which are in cipher, give: (1) the offence; (2) the person wanted; (3) his age, height, and build; (4) complexion, hair, eyes, shape of face; (5) personal peculiarities and distinctive marks; (6) clothing; (7) where he is likely to be found; (8) instructions as to what is to be done; (9) offering the wire or cable, which is indicated by a registered number.

All the information collected at one headquarters is at the disposal of the police of other countries, with the result that year by year the way of the habitual transgressor becomes more and more hard.

## Many Submarine Cities

Were Built Below Sea Level and Gradually Became Flooded

Some few months ago a Russian vessel, bound for Japan, was driven off course by a strong gale and forced to shelter in the Caspian Sea. When the ship was in the Caspian Sea, writes G. J. Watson, in Popular Science, the storm abated and the floating derrick lowered the crew looked over the side. The ship and were surprised to see the ruins of an old town. Many of its largest buildings and longest streets could be seen distinctly, and investigation proved it to be an old town called Hara, which, this, however, is by no means the first discovery of a lost city or cities of a submarine town. Others have been found and are known to exist round the shores of almost every country in the world. It is thought that there are several at the bottom of the Zuider Zee, and quite a number have been found round the Greek islands. These were lost through earthquakes which lowered them so much below sea level that the waters which once flooded them. Another very large city is supposed to have sunk off the coast of Brittany some centuries ago. The city stood below sea level and the sea was lost out by sluice gates, but a certain Princess Dahui, wishing to end her life, opened the gates and allowed the waters to flood the city.

Another submerged city of very great interest is one of the coast of Java, an island near Timor. It was discovered by an Arab fisherman many months ago and investigation has led us to believe that it was once a part of the ancient Phoenicians.

## Memorial to Mercantile Marine

Britain's memorial to the 12,000 members of the mercantile marine whose war graves are in the sea is to be erected on the south side of Trinity square, Tower Hill, London, overlooking the river gateway to the seven seas. The memorial will have inscribed upon it the 12,000 names. It will take the form of a vaulted corridor 64 feet long, divided into three bays, with archways at each end, of free stone and 21 feet high.

## Mount McKinley Ice Fall

Surpassing any waterfall in grandeur, an ice fall is a part of the fascinating scenery of Mount McKinley, according to the superintendent of the Alaska National Park at Seattle, Washington, for the winter. A large glacier coming down from a height of 15,000 feet to the 10,000 foot level makes a sheer drop of 3,000 feet. This stupendous fall of ice continues perennially.

## Trappers Secure Wolf Skins

Northern Alberta's wolf population is of large dimensions, no less than 50,000 skins having been shipped out of this province as furs in the last year. They form a substantial source of revenue to trappers in the wilds.

Poor men and poor umbrellas generally get left.

W. M. Gordon, for many years Superintendent of the Canadian Pacific Express Company in Winnipeg, has been promoted to a similar position in Vancouver. Mr. Gordon in his new position has jurisdiction over the Company's Express business in the Province of British Columbia and Alberta.

## World's Largest Cities

Greater London Leads With Population of 7,476,168

Greater London, England, is the largest city in the world with a population (census of 1921) of 7,476,168. The second city in size is Greater New York, which, according to census of 1925, has a population of 6,103,284.

The largest city in Continental Europe is Berlin, capital of Germany, which, according to the census of 1925, has a population of 4,000,000. Berlin is the third largest city in the world, and the fourth is Paris, the capital of France. The largest city in the East is Tokyo, Japan. Before the recent earthquake it had a population of about 2,300,000.

A Smart Raglan Coat for the Junior Miss

Soft woven material makes this raglan-sleeve coat. The comfortable raglan is always a joy to the growing girl. The tailored collar, which is convertible, may be fastened closely about the neck as illustrated, or left open. The large patch pocket and wide turn-back cuffs, together with the smart cut, make No. 1074 a practical and easily fashioned style.

Size 10 requires 2 1/2 yards fabric, or 2 1/2 yards 54-inch material. The designs illustrated in our new Fashion Book are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, shapeliness and economy will find her desire fulfilled in our patterns. Price of the book 10 cents the copy.

## How To Order Patterns

Town .....

It costs a man a lot to live up to his ideals. That's the reason many a man can't afford to get married.

Boys Growing Taller  
Says Chicago Doctor

Lead by Over Two Inches Boys of Fifty Years Ago

The American boy is two and a half inches taller than he was 50 years ago. Dr. Horace May of Chicago told the anthropological section of the American Association for the Advancement of Science at Philadelphia.

"In comparison with the figures published by Howells in Boston in 1877 and 1879," he said, "our modern American boys of American-born parents exceed in height by an average of slightly more than two and a half inches."

Dr. Gray's figures were worked out at the Institute for Juvenile Research at Chicago.

"This paper is concerned not with the cause," he said, "but with the phenomenon. It might be argued that the American boy of today is taller because he matures more quickly. But the trend of two and a half inches is maintained from six years of age right up to eighteen and therefore this assumption falls."

"Differences in stature of children may be due to difference in ancestry or economic class. But presumably the more important cause for this apparent increasing tallness is due to progress in control of infantile diseases which damage growth or to knowledge of vitamins, sunlight and exercise, with consequent better nutrition."

## Many Foreigners In Paris

Every Tenth of People Living in French City is Alien

One of every ten persons residing in the Paris district is a foreigner, according to the latest census returns of the Minister of the Interior for 1926. The exact figure of the Parisian population is not given in the census, it being made difficult to determine, so that the estimate is an approximate one. However, it is within a fraction of the truth.

The returns give the total inhabitants of the Seine department as 4,628,657; that of the Seine-et-Oise department 1,137,525.

The whole of the former department is contained within Paris and a large part of the latter. The number of foreigners residing in the Seine is 212,781; Seine-et-Oise, 82,910.

The foreign population of the Alpes-Maritimes department which comprises the Riviera, is still more dense, there being 136,618 foreigners out of a total population of 425,252. This figure, of course, does not include the floating tourist population, only genuine residents. The total for the whole of France is 6,713,351 inhabitants. Of these 2,498,321 are foreigners.

## Arrange Hunt For Prince

Calgary Fox Hound Club to Invite Prince of Wales to Special Drag Hunt

The Prince of Wales, who is expected to visit his Alberta ranch in the fall, is to be invited to a special drag hunt which will be held in the country south of Calgary by the local fox hound club. The club owns a pack of fox hounds, and farmers have signified their intention of taking down some of their wire fences, replacing them with post and rail.

## Plums in the West

Results of a plum growing experiment at the Lethbridge Experiment Station gives hope that in a few years there will be sufficient stock of a dependable variety of plums on hand to get southern Alberta farmers started with a new fruit which is hardly and hard to grow. A selected seedling, known as "Manitoba Queenly Seedlings" give greatest promise and are being used at the Lethbridge Station for propagation purposes. The variety in favorable seasons yields a fair return in time fruit.

## Search for Ark of Covenant

Search for the ark of the covenant, the most sacred thing in the worship of ancient Judaism, soon will begin on Mount Nebo, where, history records, the ark was hidden in the sixth century B.C., by the prophet Jeremiah. A. J. Patterson, president of the American-Jordanian Bible Institute of Los Angeles, who has arrived to make the search is one of those who believe that many of the ancient prophecies of the Bible are on the eve of fulfillment.

Powerful searchlights, sunk below ground level in a concrete trough, with flat glass cover, have been installed at London's air port, so that airplanes can be seen directly on the lights if necessary.

Many a man becomes a quibbler through his strenuous efforts to feather his nest.

In certain parts of Africa locusts attain a length of 4 inches.

H. N. Simpson, who has been appointed superintendent of the Canadian Pacific Express Company at Winnipeg with jurisdiction over Manitoba and Saskatchewan, and Ontario, west of Port Arthur, Mr. Simpson succeeds W. M. Gordon, now superintendent at Vancouver.

## Expert in Slow Motion

Indian Artist in London Zoo Very Deliberate in His Movements

A recent arrival in the London Zoological Gardens is an Indian expert in slow motion stunts.

It is known as Slow Loris—a creature meaning a clown—but the Bengali call it "Sharnadhi" (Sharnadhi) on account of its leisurely movements. Those who have watched the ridiculous deliberate manner in which a chameleon moves are strikingly suggestive of slow motion cinematography.

It will have some idea of how the Slow Loris goes about the world. As it feeds chiefly on fruit, there is no need for haste as long as it reaches it before it ripens and falls.

The Loris is really the Indo-Malay representative of the lemurs. They are commonly called sloths in India, but their soft, huge staring eyes, rudimentary tails and imperfectly developed index-fingers render Loris easy of recognition. The smallest is the slender Loris of the forests of Malabar and Ceylon, a creature scarcely taller than a squirrel.

The slow Loris, after taking its leisurely exercise by night, takes its rest clinging to the top of a branch, upside down.

SUNDAY SCHOOL LESSON  
JANUARY 22

## PRAYER IN THE CHRISTIAN LIFE

Golden Text: Ask, and it shall be given you; seek, and ye shall find; knock, and it shall be opened unto you.—Matthew 7:7.

Lesson: Mark 1:35; 14:23-36; Matt. 26:39-46; Luke 22:39-46; John 17:1-13.

## Explanations and Comments

1. The Habit of Prayer: Mark 1:35. "He went forth to pray." His days of strenuous work Jesus was in the habit of going off early in the morning to a quiet spot—a deserted place, where there were no people and pray. He began the day with God. Alone in nature, Jesus was at his Father's house. His strength was renewed and his plans were clarified, for there he learned his Father's will. He was ready that He should need to pray? Remember the tendency of the life, the tendency of the best life, to run down. Nobody knew this as well as Jesus did. See what he said about it. See clearly what He did about it. He did not pray just to get an example. He lived the life of prayer because for Him it was worth living.—(William Fraser McLoughlin).

2. Much prayer means much power; little prayer means little power; no prayer means no power.—(St. Bernard). If the Spirit in Which all True Prayer Must be Offered, 14:23-36. When Jesus and His eleven disciples reached the Garden of Gethsemane he said to eight of them, "Sit ye here while I pray," and then went further on into the garden with Peter, James and John who were to watch with Him. It was a bitter hour. The tendency of the best life, to run down. Nobody knew this as well as Jesus did. See what he said about it. See clearly what He did about it. He did not pray just to get an example. He lived the life of prayer because for Him it was worth living.—(William Fraser McLoughlin).

3. The reason why Empire grievances are so readily dropped at Imperial Conferences is that so few real grievances exist. Said an Irish physician of a patient, "If he lives till morning he may pull through, but if he doesn't, there's no hope for him."

Paradoxical though it may seem, a wedding ceremony isn't considered a success unless there is a hitch in it somewhere.

If a young man sows wild oats mixed with old rye he is reasonably sure to raise a disturbance.

Some writers use words that are larger than their ideas.

New Science  
Of Television

Development Will Bring Radio Movies Right into the Home

The family of the not far distant is promised radio movies to add to its evening's entertainment.

Radio engineers base their hopes for the development of the new science of television on a crude apparatus exhibited in New York City by Dr. E. F. W. Alexanderson, consulting engineer of the General Electric Company, and of the Radio Corporation of America, which causes several little shots of light to glaze and blend across a screen.

Demonstrating his apparatus before the Institute of Radio Engineers, Dr. Alexanderson, by rotating these light dots rapidly, caused the entire screen to be covered by lines of light of different intensity.

The remaining problem, he explained, is to modify these lines by a reflected image so that the various tones which will be projected by electrical processes to the carrier wave and through the receiving instrument to the screen.

Radio photography is now an accomplished fact, he said. A simple photograph, five or six inches, can now be sent through the air in two minutes, by the dot-and-dash system. Dr. Alexanderson said, however, that he is experimenting with another method which, made by the dot-and-dash system, produces a smoother reproduction of a photograph at a greater speed.

By Dr. Alexanderson's method, the radio photograph is made as if by a flash of light or a vibrating electric lamp, were drawn rapidly up and down the picture, registering black or grey or white.

By this method, Dr. Alexanderson said, he has broadcast three pictures from his laboratory to his home two miles away. They were pictures of 21 inches, and were made in two minutes.

"We may speculate," he said, "about the practical usefulness, whether the pictures, were drawn rapidly up and down the picture, registering black or grey or white."

"On the other hand, we may foresee that the facsimile telegraph will supercede telegraphy by code. We may even hope that it will take the place of sound of the correspondence that is carried on by mail and type-written sheets may be drawn rapidly up and down the picture, registering black or grey or white."

## Successful Wintering Of Bees

Must Have Adequate Protection From Cold and Changeable Temperatures

In Canada there are three important factors necessary for successful wintering of bees, the neglect of any one of which will either cause the death of the colony or so seriously weaken it as to make it an unprofitable producer. These factors according to Mr. C. B. Goodenough, the Dominion Apiarist, in his bulletin on Wintering Bees in Canada, are: First, strong (that is to say) populous colonies consisting mainly of young bees; second, an abundance of wholesome stores; and third, adequate protection from cold and changeable temperatures.

For the carrying out of these conditions Mr. Goodenough advises that for outdoor wintering the bees should be packed in their cases in the fall and that for indoor wintering they should be taken in before settled cold weather commences; that the cases for outdoor wintering should be large enough to hold sufficient packing in addition to the colonies and should be tight to prevent the packing becoming wet; that the apiary be surrounded with a good wind-break; that indoors the cellar be protected from outdoor temperatures so that the temperature may be kept within a range of from 45 to 50 degrees F.; that the cellar be kept dark, fairly dry, and provided with a good system of ventilation; that the bees be not disturbed after being packed in winter quarters; that they be left in the cellar until after the first snow has fallen in the spring; and that outdoor-wintered bees be left in their cases until the end of May or early June.

Canadian Maples for New Orleans

A group of Manitoba maple trees in the public park in New Orleans, La., will commemorate the "Palm-to-Pine" sociability trip undertaken by a group of Canadian men of the Southern cities, who were invited to visit the city of the Pelicans, last fall. Arrangements have been made by the City Council of New Orleans for importation of the saplings, which will be planted along one of the principal parks of the park.

When a woman marries she not only takes a man's name but everything else he has.

Opportunity sometimes has to kick a man before it can wake him up.
